I-94 Road and Bridge Reconstruction, Jackson County

[View Other Major Projects](#)

Start: Summer 2018 **End:** Spring 2020

Investment: \$109 million

Local, national and international trade traffic on I-94 in Jackson has increased substantially since the freeway opened to traffic in 1960. The current corridor is, in part, functionally obsolete and is scheduled to be upgraded to current design standards in the next seven to 10 years. MDOT is beginning another series of projects to update this corridor, with the goal to balance safety, mobility, lifecycle costs, aesthetics, and environmental sustainability. The current project will begin in summer 2018 and last through spring 2020.

The new Cooper Street bridge will be a part of the rebuilt and redesigned I-94/Cooper Street interchange that will include new roundabouts on each side of the bridge. These roundabouts will allow traffic to operate more smoothly and efficiently, and increase safety with fewer conflict points. For more information about roundabouts, go to www.michigan.gov/roundabouts.
