

Spring Arbor

Spring Arbor has the potential to support a lot of walking and bicycling trips due to Spring Arbor University and proximity to the Falling Waters Trail. Recent projects along Main and Teft are improving bike/ped connections in the community.

Priorities

- Completing sidewalk gaps; with a focus on 2nd Street
- Improve crosswalks so they are compliant with the Americans with Disabilities Act and provide safe routes to schools and Spring Arbor University
- Provide trail connections to Western School Campus, Bean Elementary School, the Falling Waters Trail and the Village of Parma

2nd Street near Spring Arbor University
Credit: Google Streetview

- 1 Improve crosswalk - rectangular rapid flash beacon, detectable warning, high visibility markings, signs
- 2 Connection to Falling Waters Trail - sidepath along Teft Road currently under development
- 3 Complete sidewalk gaps along 2nd Street, Dickens St, Henderson, Richard, Main and College St
- 4 Sidewalk connection to Bean Elementary School - work with private land owners
- 5 Sidepath along Chapel Road connecting to Western School Campus and Parma
- 6 Pathway connection from Richards Road to Dearing through city-owned property
- 7 Sidewalk connection along King Road to Nobel Road and Bean Elementary School

Note:
Local efforts have been focusing on Dearing Road as the main connection to Western School Campus. However, based on further input and feasibility studies, this Plan recommends Chapel Road be considered.
