June 2, 2021

Dear Lenawee County Commission,

This letter is in response to the Springville Commercial Development and Rezoning project being proposed within Loch Erin. I have been Loch Erin residents since 2020. I specifically purchased on Loch Erin because it was a PRIVATE and well managed lake community that consisted of private residences and prohibited weekly rentals. I believe this helps to provide a safer, quieter, and more stable living environment, as your neighbors are knowledgeable and respectful of the lake rules.

I have great concerns regarding the plans to build a Restaurant/Bar and 75 Condos with dock slips on the proposed 20 acres. The proposed plans do not conform with the goals, objectives, and strategies of the Cambridge Township long term master plan, and is also a violation of the Funneling Act.

This type of development is not consistent with the desires of the residents of this community. The fact that this is a PRIVATE lake for permanent residents leads to reasonable and responsible use of the lake and the parks. The behaviors displayed and boat traffic seen on public lakes such as Devil's are not what Loch Erin residents want. If they had wanted that they would have chosen a different lake.

The failure to control boats entering the water, that may not be cleaned before entering the water, could bring invasive species to Loch Erin. This unchecked activity led to the spread of Zebra Muscles in Higgins Lake, which led to property values declining by up to 50% when use of the lake became limited due to rashes incurred by those getting in the water. The issue was eventually resolved after 9 years and a cost of \$750,000.

Opening up the lake to pedestrian traffic can lead to safety issues with boaters not understanding the rules we have implemented on the lake for the safety of our community.

Many people in our community have laid out numerous and detailed reasons why the development of this parcel as commercial is a bad idea for our lake community so I will not go into the details that they have so eloquently noted in detail. Let me just say that I am vehemently opposed to the Baloor Development and Rezoning project for all of the reasons that have been previously documented.

Sincerely.

Debra Bokatzián

Realtor, Associate Broker and Loch Erin Resident Kathy Zmijewski

517-403-4930 kathyz@howardhanna.com

5/10/2021

Dear Cambridge Township Zoning Board,

This letter is in response to the Baloor Development and Rezoning project issue at Loch Erin. I have been a Loch Erin resident since 1991, and a local Realtor since 1994. I have great concerns regarding the plans to build a Restaurant/Bar and 75 Condos with dock slips on the proposed 20 acres. The proposed plans do not conform with the goals, objectives, and strategies of the Cambridge Township long term master plan, and is also a violation of the Funneling Act. In fact, they seem to create more problems than they solve, as is typically the case with strip zoning. This rezoning request is an incompatible land use. It does not promote the highest and best use of the land or effective utilization of our resources. This is strip development at its worst, which is highly discouraged and inappropriate and irresponsible for the area. It also does not preserve the integrity or the rural character of the area. To protect the health, safety and welfare of the lake, and the aquatic life, we need a study to understand the impact of the sewer and all water issues, to know how they will all be impacted. We also owe it to the residents to preserve the beautification and the natural appearance of the area, and to allow the continuation of existing agricultural and residential usage with minimal interference from all development. To preserve and protect the natural features of this township, and to avoid any issues of exterior obsolescence, we also should be looking at many other issues, including but not limited to requiring groundwater recharge mapping to be submitted as part of any site plan, ensuring compliance with the Lenawee County soil erosion and sedimentation programs, and preservation of all of our natural features, including the need for physical buffering for all neighbors involved. Some of the small channels to Loch Erin are very shallow, and hard to navigate. This issue alone may also be problematic for all of those proposed docks. There is also an issue of the small 2 lane roads that service this area, and the limited site distance, the traffic patterns, as well as the rate of accidents that happen at the intersection of Springville and Stephenson area, which are not ready for all of the new traffic that this development will bring. There is no doubt that our market needs new

homes, however they should be built in compliance with the current zoning rules and laws. I know that you have an exceedingly difficult decision to make. I appreciate you taking the time to read my letter.

Respectfully Submitted,

Kathy Zmijewski

June 2, 2021

Dear Lenawee County Commission,

This letter is in response to the Springville Commercial Development and Rezoning project being proposed within Loch Erin. I have been Loch Erin residents since 2020. I specifically purchased on Loch Erin because it was a PRIVATE and well managed lake community that consisted of private residences and prohibited weekly rentals. I believe this helps to provide a safer, quieter, and more stable living environment, as your neighbors are knowledgeable and respectful of the lake rules.

I have great concerns regarding the plans to build a Restaurant/Bar and 75 Condos with dock slips on the proposed 20 acres. The proposed plans do not conform with the goals, objectives, and strategies of the Cambridge Township long term master plan, and is also a violation of the Funneling Act.

This type of development is not consistent with the desires of the residents of this community. The fact that this is a PRIVATE lake for permanent residents leads to reasonable and responsible use of the lake and the parks. The behaviors displayed and boat traffic seen on public lakes such as Devil's are not what Loch Erin residents want. If they had wanted that they would have chosen a different lake.

The failure to control boats entering the water, that may not be cleaned before entering the water, could bring invasive species to Loch Erin. This unchecked activity led to the spread of Zebra Muscles in Higgins Lake, which led to property values declining by up to 50% when use of the lake became limited due to rashes incurred by those getting in the water. The issue was eventually resolved after 9 years and a cost of \$750,000.

Opening up the lake to pedestrian traffic can lead to safety issues with boaters not understanding the rules we have implemented on the lake for the safety of our community.

Many people in our community have laid out numerous and detailed reasons why the development of this parcel as commercial is a bad idea for our lake community so I will not go into the details that they have so eloquently noted in detail. Let me just say that I am vehemently opposed to the Baloor Development and Rezoning project for all of the reasons that have been previously documented.

Sincerely.

Debra Bokatzián

The behaviors displayed and boat traffic seen on public lakes such as Devil's are not what Loch Erin residents want. If they had wanted that they would have chosen a different lake.

The failure to control boats entering the water, that may not be cleaned before entering the water, could bring invasive species to Loch Erin. This unchecked activity led to the spread of Zebra Muscles in Higgins Lake, which led to property values declining by up to 50% when use of the lake became limited due to rashes incurred by those getting in the water. The issue was eventually resolved after 9 years and a cost of \$750,000.

Opening up the lake to pedestrian traffic can lead to safety issues with boaters not understanding the rules we have implemented on the lake for the safety of our community.

Many people in our community have laid out numerous and detailed reasons why the development of this parcel as commercial is a bad idea for our lake community so I will not go into the details that they have so eloquently noted in detail. Let me just say that I am vehemently opposed to the Baloor Development and Rezoning project for all of the reasons that have been previously documented.

Sinderely,

James Sylvia

8504 O'Dowling Drive Onsted, MI 49265

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

Andrew Vanderbi)K (1)	as for	5/16/21	3,	

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

Loch Erin Community Action Group(LECAG)

June 7, 2021

Lenawee County Planning Commission 120 W. Michigan Ave., 9th Floor, Jackson, MI 49201

Attention: Grant Bauman www.region2planning.com gbauman@mijackson.org

RE: Loch Erin Community Action Group (LECAG) Opposition to 2 Rezoning Requests from Baloor Development (Pete Buzby) off Springville Hwy.

Dear Valued Lenawee County Representatives;

In writing this letter, Loch Erin Community Action Group (LECAG) which represents the majority residents of Loch Erin and surrounding community residents of Onsted, would like to convey our STRONG OPPOSITION to two rezoning requests submitted by Baloor Development (Pete Buzby):

- 1.) Request to rezone 3.19 acres from Lake Residential to Commercial for proposed development of a restaurant/bar/boat launch and 75 boat docks.
- 2.) Request to rezone 18.75 acres from Agricultural to Lake Residential for proposed development of moderate density housing, 73 condominiums units.

Both of these requests DO NOT align with the current goals, objectives, strategies of the 20-year Cambridge Township Masterplan and Land Use Maps which were developed in unison with population and voice of this community. The proposed plan, also, does not conform to township ordinances.

LECAG has secured over 1,028 petition signatures, to date, opposing the proposed development and rezoning requests. We are urging each one of you to do your due diligence, as our elected representatives, to follow what has been set forth before our township to guide this community. Residents of Loch Erin whom have purchased or built homes relied on this information, along with the By-Laws of Loch Erin, to protect the future of their investment. There is no language found in either the Master Plan or Loch Erin By-Laws or Surrounding Marketing of the lake environment that would lead one to believe a proposed development of this magnitude could ever be possible on or near Loch Erin. See references below:

<u>Township Master Plan:</u> below are just a few of many references that do not align with the proposed request.

"Among the reasons for this was a desire to avoid a random and inefficient land development pattern."

Loch Erin Community Action Group(LECAG)

"A land use plan directs future growth toward areas of the Township more capable of handling the specific nature and intensity of land uses"

"the Michigan Planning Enabling Act, or P.A. 33 of 2008. The Michigan Zoning Enabling Act, or P.A. 110 of 2006 also requires that zoning be based on a plan that Enabling Act, or P.A. 110 of 2006 also requires that zoning be based on a plan that promotes health, safety, and general welfare."

"Quality of surface and groundwater. While water quality was not identified as an existing issue, population growth around lakes poses a potential threat to water quality. Increased development around water bodies threatens the quality of surface and ground water in the Township."

"Protection of natural features. Cambridge Township has a variety of natural features including wetlands, woodlands, groundwater recharge areas, steep slopes, and bodies of water. Natural features should be preserved because they are an essential part of the remaining rural nature of the Township. They also can form part of a greenways system."

"Avoid strip commercial development. Fortunately, little strip commercial development has taken place to date in the Township. Strip development is inefficient, consumes natural resources, grows outward from the limits of existing development, and ruins sense of place. Consider using zoning to prevent strips, adopt architectural standards, and use plantings to soften the view, restrict signage, and deal with traffic congestion and pedestrian access."

"Require development site plans to conform to the topography, instead of the topography conforming to the site plan"

"Residential Goals, Objectives and strategies do not conform to this proposed development or rezoning request."

"Moderate-Density Residential- The moderate-density residential designation is often located in the vicinity of more intensive development including platted areas near lakes that have no direct lake access, and areas along Slee and Onsted Highway adjacent to the Village of Onsted. In addition, areas along Brighton Highway and Sports Park Drive have been identified as moderate-density residential."

<u>Land Use Maps:</u> 8875 Springville Hwy property is clearly segmented as Agricultural and Lake Residential. The proposed development is incompatible with the land use map and does not preserve and protect the character, landscape, ecosystems and integrity of the community it is being proposed to. We urge you to make your decision based on this.

<u>Loch Erin By-Laws and communications to current residents and potential residents</u>: Loch Erin is an Exclusive, Private, Quiet, Single Family Residential Lake Community.

<u>Realtors Marketing</u> (google Loch Erin): Loch Erin a Private, Quiet, single family residential lake community.

For all the reasons above over 1,028 residents oppose this rezoning, along with reasons of:

- -Decreased quality of life as currently known
- -Greater the density the greater the magnitude of safety in and out of the lake.
- -Added light and noise pollution from a large development and the heavy traffic in and out.
- -Reduction in property values due to strip development, particularly adjacent properties.
- -Decreased preservation of natural wildlife and habitats that add to the character of the community.
- -Protection of current ecology of the land and lake.
- -Current state of Loch Erin lake being out of balance in water quality, ecosystems and wetlands.
- -Increased crime as it relates to commercial development.

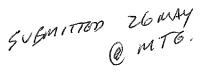

Lastly, it is important to note that LECAG membership does not discourage Cambridge township to approve or landowner to build in compliance with the current land use AS IS currently zoned. Preserving the integrity of the current land use map would continue to protect, preserve and maintain the current landscape of the exclusive, private, single family residential lake community its natural beauty, fragile ecosystems, rural feel, and property values.

Respectfully,

Loch Erin Community Action Group (LECAG)

Cambridge Township Master Plan

Comments/notes

I am here tonight to speak to the Parcel Identified as CAO-126-1105-00 that is on the agenda for rezoning consideration. A portion of this parcel would go from Ag to Lake residential (these zoning districts are clearly defined in the Townships zoning districts) and the other portion of this Parcel would go from Lake residential to C-2 (seems like an arbitrary request considering the existing zoning and surrounding parcels of land). In my preparation for this hearing, I spent some time reviewing the Cambridge Township Master/Land Use Plan and here is the summary of my findings.

- 1) The Current version was adopted by Township Planning Commission on 6/29/2011 with assistance from Region 2 Planning Commission in Jackson Mi.
- 2) There was a direct reference to the Michigan Planning Enabling Act (P.A. 33 of 2008) for the direct purpose of providing a guide for the physical development of the township. It was based on a 'thorough' study along with Public comment. It also references a typical 5-year review period.
- 3) In Chapter 1, it expressly states the Master Plan provides a vision for 20 years and is intended to avoid random and inefficient land redevelopment patterns and provides a guide for zoning decisions.
- 4) In Chapter 3 a reference is made to issue identification, one of these issues is expressed as the potential threat to water quality with increased development around bodies of water.
- 5) Chapter 4 references the Goals, Objectives and Strategies as a result of these extensive studies and public comment. The Chapter provides a complete narrative and the future land use map is discussed in Chapter 5. The various **Objectives and Goals listed in Chapter 4 provide a solid foundation of reference when considering any changes within the Master Plan.** The key points highlight where multiple-family residential should be encouraged and what **conditions precedent** should be there. It also discourages rezoning of any additional land to high density residential zoning such as RM-1 until existing zoned areas have been built out. It also recommends avoiding commercial zoning without transitional zoning.
- 6) Chapter 5 lists the various types of Residential Zoning (Low-Density 1-2 homes per acre with soils adequate for septic), Moderate-Density Residential (3-4 single family dwellings in platted areas near lakes with no direct lake access), Lake Residential (unique aspects of existing lake lots and potential for existing non-conforming parcels and a lake overlay district), High-Density Residential (intended to accommodate existing and expansion of apartments and manufactured housing with 4 dwellings per acre. The availability of central sewer facilities is preferred for this type of zoning). Commercial zoning is encouraged along the US-12 and M-50 corridors, clearly not in an Ag and residential area along Springville Highway.

- 7) The Future Land Use Planning Map, clearly shows the land on the west end of Loch Erin to be 'Lake Residential' and then 'Low-Density Residential' up to the Springville Highway.
- 8) Rezoning Criteria, of particular note are the four standards listed below;
 - a. Is the proposed rezoning consistent with the **policies and uses** proposed for that area in the master plan?
 - b. Will **all of** the uses allowed under the proposed rezoning **be compatible** with other zoning and uses in the surrounding area?
 - c. Will any public services and facilities be significantly adversely impacted by a development or use allowed under the requested rezoning?
 - d. Will the uses allowed under the proposed rezoning be equally or better suited to the area than the uses allowed under the current zoning of the land?
- 9) According to the Groundwater Recharge Area map, the parcel(s) in question are part of this area as well, and this should be considered as part of the application process for rezoning.
- 10) Central Sewer system is also highlighted for the specific area around Loch Erin and has noted the system design criteria/capacity.
- 11) Direct reference to the public workshop conducted prior to the Master Plan review/Revision, clearly a community effort.

It would seem the existing legally defined parcel is requesting a 'split zoning' consideration and is trying to define Lake Residential as medium/high density residential which it is not, and then to consider a split of this parcel to C-2 zoning. This type of action would be viewed as a 'spot' rezoning and in direct conflict with the goals and objectives of the Master Plan/Future Land Use Plan within Cambridge Township.

As a resident of Lenawee County and Loch Erin, I respectfully request the Planning Commission issue a **not recommended** on these requests for re-zoning on this single parcel of land based on the existing and approved Master/Land Use Plan for this Township and as summarized in my outline, which represents the Townships Master/Land Use Plan. As I understand the process, the Planning Commission will provide some form of recommendation, and then the matter is referred to the Lenawee County Planning Commission for a recommendation and ultimately the Cambridge Township Board takes these recommendations into consideration and is charged with final decision-making authority.

Dan Fahrer

8585 Odowling

SUBMITTED 26 MAY 26 MAY

#1. Request for Denial of Approval Of Zoning Change from <u>AGRICULTURAL</u> TO LAKE RESIDENTIAL

My name is Patrick Coulter, I live at 8480 Odowling, Onsted MI which is one of the 10 Loch Erin Subdivisions. I am here to request that the CambidgeTwp. Planning Commission <u>DENY</u> the approval of a request for rezoning of a parcel of land on Springville Highway connected to Lake Loch Erin and the Loch Erin community.

- 1. The reason for request for denial is that rezoning would create an increase in population which would create an increase in traffic in the area and on the lake. An increase in population on the lake would create further stress on the lake which is already in jeopardy and the lake community is currently working diligently with the DNR, EAGLE AND THE RAISIN RIVER WATERSHED GROUP to sustain the health and the viability of our lake.
- 2. An increase in population in the neighborhood would increase traffic congestion, increase the need for Fire and Police manpower, and infrastructure improvement.

For these reasons I respectfully request the Planning Commission deny the approval of a zoning change from Agricultural to Lake Residential.

#2 Request for denial of approval of zoning change <u>from Lake Residential to</u> <u>Commercial</u>

My reason for request for denial are as follows:

- 1. Loch Erin is a private lake and this is the reason most of the homeowners purchased the land and built there. It is already becoming more crowded due to most of the individual lots being sold and built on. The addition of 60 or more homes and families would only make the lake that much more crowded and increase the stress on the fragile ecosystem.
- 2. There are currently NO commercial establishments in this area and nor do most of the residents desire one. It is my understanding that once the zoning status has been changed, that it can never be reversed. Basically, one that district has been changed to commercial, it remains commercial forever. That allows for the possibility for other commercial ventures in the area.

- 3. The increase intraffic and congestion is a forgone conclusion with so many new residences in a small area. This is something most residents would not be in favor of. Many residents, myself included moved here to escape that frustration.
- 4. For the reasons I request the Planning Commission deny the request for commercial rezoning.

Subject: Springville Road Development Project

Attention: Tom Kissel

We as lake property owners are totally against the Springville Road development because Lochn Erin was developed as a private lake community with relatively large lakefront lots, specific home size requirements and restricted access to the recreational lake to minimize watercraft traffic and ensure safety on the lake. In our opinion is not consistent with the Loch Erin plan originally approved by the twp.

We feel that the proposal violates several twp ordinances Section 36.256 and Section 36.258 re: rezoning/redistricting. The size of proposed living units, is at the extreme low end of the minimum size requirements. Safety of the 70+ individual wells on this parcel is not known. Paved roads are not indicated in the proposal. Traffic is a concern with the use of Irish Mist road and an Irish Mist owned property with a 10ft utility access easement as an entrance is not viewed favorably. There is no mention of required vegetative buffers for adequate screening to adjacent properties.

A huge concern exists with any new additional land development on the lakefront. All of the lake issues could be amplified and worsened. This could reduce individual waterfront property values which could reduce the tax base. Also, any new impairments could lead to the Loch Erin basin becoming unusable as the USEPA has the ability to shut down recreational lakes with excessive algae toxins.

The restaurant is a very poor idea since several have closed or operated with reduced hours. The proposed marina/park is located on a narrow shallow inlet which would increase boat traffic and safety of swimmers and other boaters.

Last year Egle placed Loch Erin on an endangered waterway list due to pollution/contamination issues. This would just add to the issue.

Thank you, David and Lynne Puskarz

Dear Sirs & Madam,

I am writing to express my strong opposition to the rezoning requests for the proposed commercial development project on Springville Highway in Cambridge Township. Not only do these rezoning requests not support the goals and objectives of the Cambridge Township Master Plan, they are, in fact, in direct opposition to those goals and objectives that were carefully and deliberately developed by the various stakeholders that contributed to said plan. Therefore, I believe that the Cambridge Township Planning Commission has no other option than to deny these rezoning requests as presented.

During the development of the Cambridge Township Master Plan public input was sought from community members. Appendix B captures the feedback from these citizens as they worked in groups to conduct a SWOT analysis of sorts. Every single group mentioned the lakes and natural beauty of the area as a strength of the community. The developer of this proposed development does not present any indication whatsoever that it is concerned with maintaining or protecting these community assets. In fact, it is very clear that this development seeks to only exploit these assets to the maximum benefit of one party; the developer. The developer is attempting to ram in as many revenue producing

opportunities into our precious natural resource without regard for the stewardship of that resource or to the community at large. These groups also mentioned the challenges of maintaining the water quality of our lakes, staving off overbuilding and development of natural areas and sprawl, and the need for zoning enforcement as direct threats to our community. To consider these rezoning requests would certainly be in direct opposition to the voice of the community that contributed to the master plan. Additionally, the Cambridge Township Master Plan has stated very specific criteria for considering rezoning requests. Should the Planning Commission even consider these requests as viable, I request that it publicly and in very specific detail state how these rezoning requests meet said criteria as the residents have the right to know how this commission arrived at this conclusion.

I am sure others have brought to your attention the negative environmental issues on Loch Erin that would result from an increase in the boating use from the proposed development. I would like to draw your attention to the actual site plan with regard to the plan to build boat slips/docks for 75 or so boats. Please take a look at the attached mock-up of what that may look like. I am certainly no artist and I admit that my renderings are not exactly to scale but they provide a realistic representation of what this proposal would look like on the water. You can clearly see how this proposal (even scaled back) presents a multitude of issues including harming the natural beauty of the cove and most importantly the safety of those enjoying the water. I must admit, if this development were to be approved as requested, I wouldn't even see it from my house. Aside from the increased boat traffic I wouldn't even know it existed. However, I can't imagine how devastated I would feel if I lived in the area of Castlebar Lane, Irish Mist or Devon Court. Developers have the right to make money in our free enterprise system but those residents, **OUR** neighbors, are entitled to the reasonable use and enjoyment of their property without a looming development just mere feet from the ends of their docks. If you ask any real estate professional they would likely agree that the property values of these residences will no doubt decrease considerably should this development become a reality. One could argue that a new development such as this would benefit our community by increasing the tax revenue. But is it wise to do this at the risk of financial harm to others in our community? As members of the Planning Commission do you feel any responsibility to assist in protecting the home values of current community residents? If you do, then there is no other course of action than to deny these rezoning requests. As stewards of our community's land use/planning do you feel that it is within the best interests of the community to allow developers to enrich themselves at the financial peril of current tax paying residents? I certainly hope not. If you agree to these rezoning requests then you are stating that is your position.

If you ask most Loch Erin residents they will probably tell you that they're not against the development of this property. We just want to see it developed sensibly given the well thought out master plan and current appropriate zoning ordinances of the township, which exist for very specific reasons. We love to see nicely built single family homes popping up within our neighborhood. We welcome and expect this type of development. This is smart development that enhances the community and brings to life the master plan that was developed by the community, as well as the well thought out plan for Loch Erin. This proposed development does nothing more than line the pockets of a developer who will surely reap the financial rewards of his initial investment and then likely move on to do the same in another community. Our municipal governing bodies, who were elected to represent the best interest of the residents, are the only thing standing between us and those looking to merely profit off of our collective assets.

Development is not a bad thing and communities need it to survive, particularly in today's economic climate. However, it is your responsibility to seek responsible development rooted in purpose and reason that benefits all community members, and certainly does no harm to any of them. I implore you to follow the spirit and intent of the currently established Cambridge Township Master Plan and current zoning ordinances and deny these zoning requests as it is the right thing to do for this community.

Sincerely,

Amy Prevo

- B. Matejewski

To all Concerned,

Hello,

My name is Gary Humberger. I live at 8654 Dalton Road, Onsted, MI 49265 on Loch Erin. My wife, Lisa, and I purchased our lot in 1984. The Wicklow subdivision had not received final approval and we needed to sign the plat map. It was a scary proposition as there were only a few houses on the lake at that time.

That same year I became a Board Member of the Loch Erin Property Owners' association. I began working with some very dedicated people, Don and Grace Edwards and Bob Squires to name a few, striving to make the promise of Loch Erin come true. In order to achieve this promise, we consulted with many entities including Cambridge Township officials, Lenawee County officials, State of Michigan officials, utilities companies and Engineering Companies. Since the original and subsequent developers went bankrupt, there was so much unknown and lots of uncertainty we attempted to assume that role. The Loch Erin Community assessed and paid for our own sewer system with Progressive Engineers out of Grand Rapids, Michigan.

While working with Progressive Engineers we began working with Anthony Groves, their Director of Lake Management Programs. His experience and knowledge helped guide us in the overall development of Loch Erin. In 1988 the LEPOA had limited resources but realized the importance of cohesive planning. We entered into a contract with Progressive Engineers for \$7500.00 to conduct the Loch Erin Lake Management Feasibility Report. Of utmost concern to Mr. Groves was lake funneling. He started communication with Cambridge Township on the adoption of a Funneling Zoning Ordinance. I have attached a letter sent to Sally Hazen at Cambridge Township from Mr. Groves dated September 26, 1988. I ask you to read the first page of this correspondence.

Apparently, the Cambridge Township Funneling Ordinance went into effect July 12, 1989. A funneling ordinance was also adopted in Franklin Township. We can never know how many times these funneling ordinances stopped developers from plans to "cash in" on Loch Erin's success.

I do know that with these ordinances, subdivision building restrictions, the Township building restrictions and codes and the Zoning and Planning Commission and Trustees, we have all worked and set the groundwork for a successful residential community. Many people have invested their time, sweat, energy, and finances in building or buying their "dream" home in Loch Erin. I use the term "dream" because NOBODY back in 1984 would have believes that we could have turned this into the community it is today. The success is based on single family detached residential homes. To deviated from this would be an insult to our community and to all the hard- working people who have spent decades. The LEPOA, Cambridge and Franklin Township Planning and Zoning Commissions, and County officials have created the rules and infrastructure for this amazing lake community. Finally, I would like to thank all of the unnamed visionaries from 35 years ago who had their foresight and common sense.

Please vote NO to any rezoning!

Thank you

Ma. Sally Hazen P.O. Box 333 Onstead, MI 49265

Re: Loch Erin

Dear Ms. Hazen:

Per our conversation, I have compiled a list of zoning ordinance provisions which address the issue of funnel development (sometimes called keyhole development).

Lake funneling occurs when a waterfront lot is used to permit access to a larger development located away from the lake's edge. Funneling, in effect, allows a large number of individuals to gain access to the lake through a small corridor of lake property. On Loch Erin, there are several large tracts of land which have the potential to provide open space for common waterfront access to backlot properties. It should be noted that any funneling provision which may ultimately be adopted in Cambridge Township will not apply to back lot owners which are presently conveyed a deeded access to the lake via existing subdivision dedications.

Several townships and counties throughout the state have included provisions which regulate lake access and shoreline use by funnel developments. Key portions of several Michigan ordinances are outlined as follows:

Hayes Township (Charlevolx County) Zoning Amendment 1985

SECTION 5.13 - SHORELAND PROTECTION STRIP

No building or structure, except docks or launch ramps, shall be erected closer than 50 feet from the shoreline at normal high water level of any lake, stream or creek within the township. In addition, a strip of land 35 feet wide from the normal high water mark bordering the body of water shall be maintained in trees and shrubs in their natural state. Trees and shrubs may be pruned, however, to afford a view of the water.

A. Limitation of Boat Dockage:

Not more than one mooring, slip or dock space for each 100 feet of lake frontage may be provided for mooring or dockage of boats in any zoning district in the township.

Progressive

B. Limitation of "Funnel Development":

Any development in any zoning district which shares a common lakefront or stream area may not permit more than one single family home, cottage, condominium or apartment to the use of each 100 feet of lake or stream frontage in such common lakefront or stream area as measured along at the water's edge of normal high water mark of the lake or stream. This restriction is intended to limit the number of users of the lake or stream frontage to preserve the quality of the waters, and to preserve the quality of recreational use of all waters within the township. This restriction shall apply to any parcel regardless of whether access to the water shall be gained by easement, common fee ownership, single fee ownership or lease.

The Zoning Board of Appeals may, upon petition and after notice and hearing as provided in Article VII, vary or modify the strict application of this provision if it shall determine that undue hardship will otherwise result and the spirit and intent of this ordinance will be preserved by such variance or modification. The Board of Appeals may, as a condition of such variance or modification, impose such conditions upon the use of the lands and lakefront or streamfront as it shall deem necessary to preserve the spirit and intent of this ordinance.

Emmet County - 1982 - Amendments to Zoning Ordinance

To add the following keyhole development controls to the RR-1 and RR-2 Recreational Residential Districts.

Section 601. Principal Uses Permitted Subject to Special Conditions:

The following uses shall be permitted upon approval of the planning commission subject to the conditions herein imposed for each use, the Conditional Review Standards in Section 2004, and the approval of the site plan:

4. Private, semi-private and other non-public recreation lands and/or facilities, subject to findings that the uses are compatible with the surrounding residential area, the uses respect the environmental qualities of the site, and no inordinate obstructions to scenic views are established. Recreational uses permitted herein include parks, playgrounds and common access sites. No such facilities shall have a commercial appearance or be of a commercial character.

for recreational uses defined in this section which have inland lake frontage, limitations on the extent, number and location of uses or facilities shall be established as follows:

Camping:

Not permitted except as an accessory use to a larger resort complex as may be permitted by prevailing zoning regulations.

Vehicle Parking:

Permitted only as necessary to afford a reasonable level of access convenience for the type of uses approved per the site plan, and when in scale with uses on adjacent properties.

Boat Docks:

One per 150 feet of horizontal lot width (not shoreline distance). Location to respect swimming beaches and docks on the same property or on adjoining properties.

Boat Slips/Moorings:

Not more than three motor powered craft per 150 feet of horizontal property width, but not more than 15 feet power craft. No facilities for launching power craft from the site shall be permitted.

Swim Raft:

One raft up to 150 square feet in floor area per recreation or park site.

Recreation Apparatus:

As approved per site plan, but not in a required setback or greenbelt area.

Club House/Gazebo:

Only as an accessory use to a larger development and when there is at least 600 feet of horizontal lot width, minimum 150 feet of setback from any property boundary, but only for the exclusive use of occupants and their guests.

se provisions shall NOT apply to accessory shoreline recreational uses on gle lots serving individual occupant families.

Otsego County Zoning Ordinance - Portion of Article 15 (Intent, definitions and site plan review procedures omitted) - 1983

tion 15A.2 Site Design Standards

following standards shall be used for development and use of non-public standards set forth by the zoning districts established and other articles ained within this ordinance.

There shall be a minimum setback line of 235 feet, as measured from the ordinary high water mark, landward, at 90 degrees and/or radial to the shoreline, to any property line, dwelling unit or room. (Refer to Rule 3 for increase of setback line.)

- There shall be a minimum of 160 feet, as measured from the ordinary high 3-2 water mark, landward, at 90 degrees and/or radial to the shoreline. This shall be the minimum depth of open land area.
- The area between Number 1 and 2 of this section, may be used as a 5=3 parking area, as required in Section 15A(6).
- The following components, equations and rules shall be used in deter-5-4 mining the minimum open land area in square feet, minimum lake frontage in linear feet, and maximum number of dwelling units or rooms to utilize the non-public lakefront access site.

Formula Components;

- A Number of dwelling units, condeminium dwelling units and motel/hotel
- 8 8,000 square feet (8,000 sq. ft. is the minimum amount of open land area, per dwelling unit or room).
- C 50 feet (required amount of lake shoreline, per dwelling unit or
- D Total amount required of lake shoreline in linear feet.
- E Total amount required of open land area in square feet.
- Rule 1: In instances where the number of dwelling units or rooms is known, the following equations shall be used to determine minimum amount of open land area in square footage (E), and the minimum amount of lake shoreline in linear feet (D).

Equations:

Rulo 2: In instances where the amount of open land area (square footage) and lake shoreline (linear feet) is known, the following equations shall be used to determine the maximum number of dealling units or rooms (A) permitted to use the open land area. The lesser of either equation shall be used as the maximum number of dwelling units or rooms permitted.

Equation:

Rule 3: In instances where a lakefront access site is a combination of open land area (S-6) and wetland (S-7), the setback line as in (S-1) shall be increased in the following manner:

Equation:

$$(A \times 11,750 \text{ sq. ft.}) + (wetland sq. ft.) * Setback line (ft) (A x C)$$

- S-5 When determining the minimum square footage of open land area (S-6) per dwelling unit or room, it shall not be permitted to include Wetlands (S-7) (refer to Rule 3).
- S-6 Open land area shall be defined as land which is not identified as wetlands and may be graded and/or filled and maintained in accordance with provisions set forth in "Soil Erosion and Sedimentation Control Act 347 of 1972, as amended." Such grading the filling shall not commence prior to approval of the Otsego County Enforcing Agency (Otsego County Zoning administrator). Furthermore, the open land area shall be unobstructed by structures/building, unless permitted by the planning commission by the review procedures set forth in Article 15A.3.
- S-7 Wetlands shall be defined as land characterized by the presence of water at a frequency and duration sufficient to support, and that under normal circumstances, does support wetland vegetation or aquatic life; and is commonly referred to as a bog, swamp or marsh, and is contiguous to an inland lake. Furthermore, these wetlands shall not be disturbed for any purpose, unless prior approval is granted by the State Enforcing Agency (DNR) of Public Act 203, of 1979, known as the Goemaere-Anderson Wetland

Prairieville Township - Barry County

Section 4.35 - Riparian Lot Use Regulations

In any zoning district where a vacant parcel of land is contiguous to a lake, river, stream, ponds or other body of water, such vacant parcel of land may be used and developed as a recreational park for the purpose of gaining riparian access and enjoyment to said body of water for the owners and occupants of two or more residential lots within, but not exceeding a one-quarter mile radius of such vacant parcel of land, subject to the following conditions:

- That said vacant parcel of land shall contain a lot depth of at least 75 feet and at least 20 lineal feet of water frontage for each dwelling unit to which such privileges are extended or dedicated.
- That in no event shall such vacant parcel of land have less than 150 lineal feet of water frontage regardless of the number of dwelling units to which such privileges are extended.
- 3. That in no event shall such vacant parcel of land consist of a swamp, marsh or bog as shown on the most recent United States geological survey maps, or abut a man-made canal.

- 4. That the vacant parcel shall be permitted not more than one dock for each 75 lineal feet of water frontage.
- 5. The within restrictions shall not be deemed to prohibit the operation of a commercial boat marina as a special land use in the "R-2" zoning classification.

I hope the information contained herein is sufficient to give you an overview of zoning ordinance provisions which regulate funnel development. If you have any questions or require additional information, do not hesitate to call.

Sincerely,

PROGRESSIVE ARCHITECTS/ENGINEERS/PLANNERS

Anthony F. Groves, M.S.

Cambridge Township Board &

Cambridge Township Planning Commission

RE: Loch Erin Community Action Group (LECAG) Opposition to 2 Rezoning Requests from Baloor Development (Pete Buzby) off Springville Hwy.

Dear Valued Cambridge Township Representatives;

In writing this letter, Loch Erin Community Action Group (LECAG) which represents the majority residents of Loch Erin and surrounding community residents of Onsted, would like to convey our STRONG OPPOSITION to two rezoning requests submitted by Baloor Development (Pete Buzby):

- 1.) Request to rezone 3.19 acres from Lake Residential to Commercial for proposed development of a restaurant/bar/boat launch and 75 boat docks.
- 2.) Request to rezone 18.75 acres from Agricultural to Lake Residential for proposed development of moderate density housing, 73 condominiums units.

Both of these requests DO NOT align with the current goals, objectives, strategies of the 20-year Township Masterplan and Land Use maps, which were developed in unison with population and voice of this community. The proposed plan, also, does not conform to township ordinances.

LECAG has secured 1,028 petition signatures, to date, opposing the proposed development and rezoning requests. We are urging each one of you to do your due diligence, as our elected representatives, to follow what has been set forth before our township to guide this community. Residents of Loch Erin whom have purchased or built homes relied on this information, along with the By-Laws of Loch Erin, to protect the future of their investment. There is no language found in either the Master Plan or Loch Erin By-Laws or Surrounding Marketing of the lake environment that would lead one to believe a proposed development of this magnitude could ever be possible on or near Loch Erin. See references below:

<u>Township Master Plan:</u> below are just a few of many references that do not align with the proposed request.

"Among the reasons for this was a desire to avoid a random and inefficient land development pattern."

"A land use plan directs future growth toward areas of the Township more capable of handling the specific nature and intensity of land uses"

"the Michigan Planning Enabling Act, or P.A. 33 of 2008. The Michigan Zoning Enabling Act, or P.A. 110 of 2006 also requires that zoning be based on a plan that Enabling Act, or P.A. 110 of 2006 also requires that zoning be based on a plan that promotes health, safety, and general welfare."

"Quality of surface and groundwater. While water quality was not identified as an existing issue, population growth around lakes poses a potential threat to water quality. Increased development around water bodies threatens the quality of surface and ground water in the Township."

"Protection of natural features. Cambridge Township has a variety of natural features including wetlands, woodlands, groundwater recharge areas, steep slopes, and bodies of water. Natural features should be preserved because they are an essential part of the remaining rural nature of the Township. They also can form part of a greenways system."

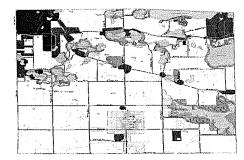

"Avoid strip commercial development. Fortunately, little strip commercial development has taken place to date in the Township. Strip development is inefficient, consumes natural resources, grows outward from the limits of existing development, and ruins sense of place. Consider using zoning to prevent strips, adopt architectural standards, and use plantings to soften the view, restrict signage, and deal with traffic congestion and pedestrian access."

"Require development site plans to conform to the topography, instead of the topography conforming to the site plan"

"Residential Goals, Objectives and strategies do not conform to this proposed development or rezoning request."

"Moderate-Density Residential- The moderate-density residential designation is often located in the vicinity of more intensive development including platted areas near lakes that have no direct lake access, and areas along Slee and Onsted Highway adjacent to the Village of Onsted. In addition, areas along Brighton Highway and Sports Park Drive have been identified as moderate-density residential."

<u>Land Use Maps:</u> 8875 Springville Hwy property is clearly segmented as Agricultural and Lake Residential. The proposed development is incompatible with the land use map and does not preserve and protect the character, landscape, ecosystems and integrity of the community it is being proposed to. We urge you to make your decision based on this.

<u>Loch Erin By-Laws and communications to current residents and potential residents</u>: Loch Erin is an Exclusive, Private, Quiet, Single Family Residential Lake Community.

<u>Realtors Marketing</u> (google Loch Erin): Loch Erin a Private, Quiet, single family residential lake community.

For all the reasons above 1,028 residents oppose this rezoning, along with reasons of:

-Decreased quality of life as currently known

- -Greater the density the greater the magnitude of safety in and out of the lake.
- -Added light and noise pollution from a large development and the heavy traffic in and out.
- -Reduction in property values due to strip development, particularly adjacent properties.
- -Decreased preservation of natural wildlife and habitats that add to the character of the community.
- -Protection of current ecology of the land and lake.
- -Current state of Loch Erin lake being out of balance in water quality, ecosystems and wetlands.
- -Increased crime as it relates to commercial development.

Lastly, it is important to note that LECAG membership does not discourage the township to approve or landowner to build in compliance with the current land use AS IS currently zoned. Preserving the current land use map would continue to protect, preserve and maintain the current landscape of the exclusive, private, single family residential lake community its natural beauty, fragile ecosystems, rural feel, and property values. Beware LECAG will form a referendum to fight this, if a recommendation is made to go forward with the proposed rezoning and plan for development.

Respectfully,

Loch Erin Community Action Group (LECAG)

Subject: Two more residents against Springville marina development

My wife and I are strongly against the proposed rezoning on Loch Erin for all the obvious reasons. The two major ones are: it is not permitted by the township master plan, and it should be regarded as spot zoning, which is illegal.

I personally circulated the petition in my neighborhood, getting 70 signatures, more than half of which were off lake, back lot residents.

Sincerely, Paul Ganz and Mary Ellen McLean

Paul M. Ganz, 8941 Kingsley Dr. Onsted, Michigan 49265 "On lake Loch Erin in the beautiful Irish Hills" 1-517-662-9369

Cambridge Township Planning Commision 9990 M-50 Onsted, MI 49265

Dear Cambridge Township Zoning Board,

This letter is in response to the Baloor Development and Rezoning project being proposed within Loch Erin. We have been Loch Erin residents since 2016. We specifically bought on Loch Erin because it was a PRIVATE and well managed lake that only allowed private residences and prohibited weekly rentals - no public access. We believe this helps to provide a safer, quieter, and more stable living environment, as your neighbors are knowledgeable and respectful of the lake rules.

If we allow this to move forward I see a number of issues, such as:

- 1. This type of development is not consistent with the desires of the residents of the area. The fact that this is a PRIVATE lake for permanent residents eads to reasonable and responsible use of the lake and the parks. The behaviors displayed and boat traffic seen on public lakes such as Devil's are not what we wanted for our life style as a family and grandchildren enjoying the lake.
- 2. Having a private boat launch that is not controlled/monitored can lead to multiple issues:
- a. The failure to control boats entering the water, that may not be cleaned before entry, could bring invasive species to Loch Erin. We do not want invasive species brought to Loch Erin, and the township would not want to bear the cost of remediation if that should occur.
- b. This can also lead to SAFETY issues. It could lead to people using the lake that are not aware of the direction to drive on the lake, which could put other boaters, tubers, skiers, etc. at risk of injury. Due to all the many coves and inlets on the lake we have a one-way policy and no wake areas at all times.
- c. In our opinion this private boat launch serves only the interest of the developer to allow non residents onto the water so that they will frequent his bar/restaurant. We would ask that you consider the rights and desires of RESIDENTS, over non-residents just coming to the lake for the day to use its resources at no cost to them as they can just use the parks (and port-a-potties) that are paid for and

maintained by the RESIDENTS, leave their trash behind, and then leave town.

- 3. Potential environmental and water quality issues with a significant increase in lake usage. Things to consider are water run-off, soil erosion, sedimentation programs, plant life, etc. Our lake water is under major quality issues and is being studied for the last several years as I am sure you are aware of.
- 4. There is much that is unknown about the impact this would cause to water and sewer issues in the community.
- 5. Decrease in property values of current owners in and around Loch Erin. This will lead to a decline in tax revenue. This would greatly impact property owners in the direct vicinity, but would also impact all Loch Erin property owners do to the increased and potential transient/non-resident traffic.
- 6. If this type of rezoning is allowed and the land is in fact not part of LEPOA, here are our are concerns:
- a. These condos could be rented by the owners on weekly basis, which would bring transient renters to our area and lake. See the above safety issues of having boat users on the lake that are not aware of lake rules, etc. Loch Erin is a lake dedicated to permanent residents, and allowing such a change would be counter to what the residents wanted when they chose this community. This could lead to current owners having their right to quiet enjoyment of their property violated by short-term renter's.
- c. They would not be required to pay dues and this would unfairly place the burden of paying for lake maintenance, stocking of the lake, maintaining the parks, fireworks display, etc. on other community residents even though these condo owners would have access to the lake.

 Conversely, if they are part of LEPOA then the proposal should be declined as it violates LEPOA rules, as I understand them, as follows:
- a. Docks may not be in the water any further than 30 feet from the shoreline (their proposed docks exceed this by a considerable amount).

- b. Only 5 motorized boats are allowed per 100 feet of frontage (their proposed docks exceed this by a considerable amount).
- c. No member may have a private boat launch on their property (they are proposing to have their own boat launch).

For the reasons noted above and for all the unanswered questions that remain I would ask that the Zoning Board decline both requests for rezoning of the Springville Highway property that is connected to Loch Erin.

It should be noted that we are not opposed to responsible building of singlefamily homes as currently zoned on the property. We are opposed to commercial development (bar/restaurant and private boat launch) and the medium density residential change that would allow the condo's to be built. We would like to see the zoning remain unchanged, and allow only for single family homes to be built.

In closing, I would like for you all to consider that the proposed project and related rezoning do not conform to the goals, objectives and strategies of the Cambridge Township long-term master plan.

Thank You for your consideration in this matter.

John and Robin Shrader 8361 Stephenson Rd

Subject: Springville Road Development Project

To: <kisseltk@yahoo.com>

Attention: William Gentner

We as lake property owners are totally against the Springville Road development because Lochn Erin was developed as a private lake community with relatively large lakefront lots, specific home size requirements and restricted access to the recreational lake to minimize watercraft traffic and ensure safety on the lake. In our opinion is not consistent with the Loch Erin plan originally approved by the twp.

We feel that the proposal violates several twp ordinances Section 36.256 and Section 36.258 re: rezoning/redistricting. The size of proposed living units, is at the extreme low end of the minimum size requirements. Safety of the 70+ individual wells on this parcel is not known. Paved roads are not indicated in the proposal. Traffic is a concern with the use of Irish Mist road and an Irish Mist owned property with a 10ft utility access easement as an entrance is not viewed favorably. There is no mention of required vegetative buffers for adequate screening to adjacent properties.

A huge concern exists with any new additional land development on the lakefront. All of the lake issues could be amplified and worsened. This could reduce individual waterfront property values which could reduce the tax base. Also, any new impairments could lead to the Loch Erin basin becoming unusable as the USEPA has the ability to shut down recreational lakes with excessive algae toxins.

The restaurant is a very poor idea since several have closed or operated with reduced hours. The proposed marina/park is located on a narrow shallow inlet which would increase boat traffic and safety of swimmers and other boaters.

Last year Egle placed Loch Erin on an endangered waterway list due to pollution/contamination issues. This would just add to the issue.

Thank you, David and Lynne Puskarz 8746 Castlebar Ln Onsted, MI 49265-2001 May 18, 2021

Ms. Annette Roesch, Clerk Township Board

Dear Ms. Roesch,

We are writing to make sure that you know that we, as taxpayers and residents of Cambridge Township in Lenawee County, oppose changing the zoning as proposed by Baloor Development/Pete Buzby. This item is on the agenda, we are told for an upcoming meeting.

We ask that you consider the negative impact of this **contrary to zoning and plans** 73 unit condominium/restaurant/bar/commercial site on a residentially zoned location. We also ask that you consider the negative impact of this **contrary to zoning and plans** residential development on an agriculturally zoned location.

There is no doubt that a property owner can do as he wishes on/with his property, however, the actions taken (building, etc.) must be in compliance with all existing zoning rules and laws. There is a plan for a reason and the proposed development strays from that plan (which has been in place for years) and there is no good documented reason to change this plan or "make an exception".

We thank you for your service to this community and hope to continue to be able to support you in that service.

Sincerel

May 21, 2021

Gentlemen,

In 2020 we made the decision to leave our home of 40 years, and fulfill the dream of owning a Michigan lake house and spending our retirement boating and fishing while surrounded by beautiful landscape and peaceful surroundings. We looked for the perfect place for two years. Loch Erin was marketed as a private lake. The community was strictly single family homes with specific association rules guaranteeing that our investment would be protected from losing value. We found a house that needed a little TLC and have devoted much energy the past year as well as our retirement benefits to improve our property. We love our new home and our neighborhood and are deeply concerned about the proposed development of farmland off Springville Hwy.

As stated in Michigan State law, a request for a zoning variance is required to have a specific reason why the property cannot be developed as it is currently zoned. Simply wanting to build a restaurant, bar, and condominiums does not meet this requirement. The law demands the request be denied if the property owner has the ability to develop the land in the manner it is currently zoned. The time to think about prospering from the land either personally or through tax revenues has passed. Homes on Loch Erin are currently being marketed as on a private lake, surrounded only by single family homes. If the zoning is changed, is this not false advertising?

Many of the home owners we have spoken to feel the same way about their home as we do. They came here, to Loch Erin for a specific reason; because it is different. They do not want a bar or restaurant or condominiums. They came here for the beautiful scenery and peaceful surroundings. Many feel this way even if they live on the other side of the lake, let alone if this development were going to be in their front yard as it is for us.

In speaking with our real estate advisor, the market value of our home would decrease as much as \$100,000 if the zoning is changed and the view from our front door changes from a lake and woods to a bar and restaurant. We also spoke to a very distressed neighbor currently building on their newly purchased lot which faces this land who will lose money before their home is completed. Is it right for Michigan State laws to be ignored and for us to lose our home values just so someone else can make more money? We are not the only people who will be affected this way. Many homeowners will suffer the same fate and any tax revenues will be lost when home values fall. The decrease in property value will not motivate pride in home ownership. The alteration in atmosphere and environment will change Loch Erin forever.

Thank you for your time and consideration.

Cambridge Township Zoning Board,

I am sending this letter in opposition to the purposed Zoning changes related to the Springville development. Numerous reasons for rejection, according to Master Plan, Bi-laws, and neighbors . As members of LEPOA and this community, we are totally against this re-zoning project to Commercial. This development will change the very nature of our rural community and produce adverse affects to, lake, property and surrounding roads and infrastructure.

We purchased our property specifically being a private lake, the amount of traffic and atmosphere of the immediate area. We are opposed to depreciating our lake and its values for an establishment of a commercial property that will severely impact the local area.

Money making projects that serve a select group or builder will sacrifice the lake and its atmosphere. I foresee major concerns to the community infrastructure, roads, water quality and traffic both enforcement and bar brawls. Noise from Motorcycles and vehicles in this rural community are not welcome.

Last year this builder attempted to gain support for a Clubhouse here in Loch Erin and was flately turned down. This attempt to create a complex that will disrupt the surrounding area and its quiet nature is a NO. Please consider the surrounding community and vote NO to this project.

Sincerely,
Janice Hall

Subject: Springville Highway Baloor Development

Dear Tom,

I'm writing in regard to the proposed rezoning and development of the Parcel 800 Block of Springville Highway by Baloor Development LLC. The plans, as presented, go against both the vision for Loch Erin by its original developers and the goals and objectives of the long-term township master plan. This should not be misconstrued as not being forward thinking; I am concerned with maintaining the integrity and well-being of our lake and community.

The request to rezone the waterfront portion of the Springville property to commercial is especially concerning to me. Commercial zoning would allow for a marina to be built on a lake that is otherwise private. While I understand the intent at this point is to build a restaurant on the site, I'm not confident that it would either be followed through as such, or successful, leaving the door open for the land to be used as a marina. Allowing non-residents to launch their watercraft, dock on and use our lake was not the vision for Loch Erin, which is exactly the reason the majority of Loch Erin residents purchased property here: a quiet, *private* lake with residential homes. In addition, the cove between Castlebar and Irish Mist is far too small to house the docks necessary for such a venture (or the proposed plan, in general) and would cause the entire area of the lake to be congested and essentially unusable to surrounding homes.

Loch Erin has been fighting water quality concerns over the past five years and has been taking the necessary steps forward to remediate the issues. Developing the Springville property as it has been presented is a serious concern of the long-term health of our watershed and would be a step in the wrong direction. Additional roadways and such a high volume of driveways on land that is surrounded by agricultural properties will drastically increase the run-off entering our lake; run-off containing sediments, nutrients that feed blue-green algae and pollutants that are harmful to our aquatic life. This is only one example of a serious environmental concern if this property were to be developed in such a manner, but it's one that is important to not only Loch Erin, but our entire downstream watershed. Proper studies would need to be conducted to determine the overall environment impact of such a development.

I, personally, am not against the development of the property as a whole. If developed, however, it should be done in a way that conforms with the surrounding area and withholds the integrity of our rural community. 75 condominiums built within a 20-acre area, averaging 1,200 square feet each does not accomplish that. In closing, I am of the opinion that the zoning requests for the proposed development on Springville Highway should **not** be recommended by the Cambridge Township Planning Commission.

Best,

Jennifer Malcolm Loch Erin Resident

Subject: No to zoning change!

Resided in Loch Erin for 25 years. It has always been single family home community and should remain that way. We really don't want or need 70 plus condos on this private lake. We are already having water quality issues without adding an additional burden of condos. This unregulated development should not even be considered. We enjoy the privacy of Loch Erin and don't want it turned into a Wampler's Lake with unregulated boat traffic. The added traffic on Springville Hwy would also create potential for serious accidents. There are no Zebra mussels in Loch Erin, what will happen when an unregulated boat launch Is installed? THIS IS A BAD IDEA! We need you to stand up for the residents of Loch Erin. Sincerely Dave Thorne

Subject: Rezoning property on Springville highway (Loch Erin)

I am writing you to express my strong opposition to the rezoning of the property on Springville highway with frontage on Loch Erin, which was recently purchased by Buzby builders. My wife and I purchased a home on Loch Erin approximately two years ago understanding that it was a PRIVATE lake with membership in the Loch Erin Property Owners Association (LEPOA) and the lake has been private since it's inception.

As I'm sure you are aware, all residence pay dues for the privilege of living in a private lake community with private parks and private boat ramp with no public access. We do so in order to have low traffic on our lake and so that the residents have more respect for the lake, their property, and it's resources. We also pay to maintain parks on the lake, maintain water quality, plant fish and have a fireworks show which is paid for by LEPOA members.

We are in total opposition to any development or rezoning of the property on Springville highway which has condominiums, a restaurant. and boat docks in it's plan. We feel that this builder is simply interested in making as much money as possible from this plan, and does not respect the interests of the Loch Erin community in any way.

If this condominium plan were allowed, there would potentially be 70 plus condominiums along with 70 more watercraft and much more vehicle and boat traffic around the area. These residents would also be taking advantage of our lake without paying any dues or having any vested interest in the lake. They would be able to launch any number of boats, use our parks, take our stocked fish, and view our fireworks at no cost.

We feel that this is a huge burden that this small lake cannot sustain. We and our neighbors moved here and bought property so that we could have a quiet, peaceful private lake where the residents respect the property and maintain it in a respectful way. We do not want any condominium development on our lake and do not want the problems that it would bring to our area. We are asking that you respect these wishes and the wishes of so many of our neighbors who STRONGLY oppose this whole project.

Sincerely, Robert and Dianna Dykstra 7380 Norfolk drive, Onsted.

To: William Gentner, Cambridge Township Supervisor

Annette Roesch, Cambridge Township Clerk Tom Kissel, Chair of Planning Commission

From: Loch Erin Property Owners Association

Subject: Loch Erin POA position on Springville Road development project

To All Concerned,

The Loch Erin Property Owners Association (LEPOA) Board would like to convey it is NOT in favor of the proposal for the subject property as shared and discussed by Mr. Buzby on April 28,2021. Loch Erin was envisioned and developed as a private lake community with relatively large lakefront lots, specific home size requirements, and restricted access to the recreational lake to minimize watercraft traffic and ensure safety on lake. LEPOA's opinion is the subject proposal, in the form shared on April 28, 2021, is not consistent with the Loch Erin plan originally approved by the township.

In its current form, LEPOA believes the proposal violates several township ordinances (Section 36.256 and Section 36.258) and re-zoning/re-districting of the subject property to a status not consistent with the surrounding properties and land use plans would be required.

Other issues of concern to LEPOA include:

- Size of proposed living units (1200-1300ft²) is at the extreme low end of minimum size requirements in LEPOA subdivision bylaws. The adjacent subdivisions of Castlebar and Irish Mist have minimum requirements of 1600ft² and 1800ft² respectively. 70+ of these units will adversely impact area home values.
- The safety of 70+ individual wells on this parcel is not known.
- The current proposal does not indicate paved roads initially. All LEPOA roadways are paved.
- The impact on traffic in the area is of concern, and the use of Irish Mist road and an Irish Mist owned property with a 10ft utility access easement as an entrance is not viewed favorably.
- The current proposal does not appear to include the required vegetative buffers to provide adequate screening to adjacent properties.

- The success of the proposed restaurant is in question. Several local restaurants have either closed or operate with reduced hours. Establishing a new restaurant seems fraught with problems and would create an eyesore for the community if not successful.
- The marina/park is located on a narrow and shallow inlet. Boat traffic in this area would be significantly increased with this proposal and the safety of swimmers and other boaters with this multiplication of boat traffic is of concern.
- EGLE last year put both Loch Erin, and Wolf Creek that feeds Loch Erin, on the endangered waterways list due to pollution/contamination issues. The addition of these housing units and construction associated with this high-density development proposal are likely to add to this issue. As the township is aware, LEPOA has partnered with the River Raisin Watershed Council to submit a proposal to EGLE requesting funding to study the issue and develop a Watershed Management Plan for the immediate watershed. A construction project of this size will likely be an impediment to the successful completion of the study.
- RLS, the lake management consultant for Loch Erin and several other local lakes, has
 indicated concern regarding the potential negative impact this project will have on lake
 health. RLS is preparing an opinion which will be shared with the township when
 completed.

Respectfully Submitted,

Christian Malcolm LEPOA President

Christian Malcolm, President Rod Kurowski, Vice President Lee Prettyman, Treasurer Don Deneweth, Trustee Joe Richard, Trustee Eric Cullum, Trustee Philip Kittredge, Trustee

Loch Erin Property Owners Association (LEPOA)

RE: Development on Loch Erin

May 15, 2021

Restorative Lake Sciences was requested by the LEPOA to provide a professional opinion on the potential impacts that additional future development could have on the Loch Erin ecosystem. Loch Erin was recently placed on the impaired waterways list from the USEPA and the state department of Environment, Great Lakes, and Energy (EGLE). This designation means that the lake is not currently able to serve all its expected and available functions due to impairments in its health due to external environmental factors. External factors such as non-point source pollution that are difficult to trace and mitigate have led to increased nutrient loading in Loch Erin and resultant blue-green algal blooms that can secrete neurotoxins and other harmful toxins to humans, pets, fish, and other aquatic life. Loch Erin currently suffers from numerous impairments such as excessive nutrients and algae, extremely low biodiversity of necessary rooted aquatic vegetation, low water clarity, erosion, and high boat traffic.

A significant concern exists with any new additional land development on the lakefront. All of the aforementioned lake issues could be amplified and worsened. This could reduce individual waterfront property values, which in turn could also reduce municipal tax base. In addition, any new impairments could lead to the Loch Erin basin becoming unusable as the USEPA has the ability to shut down recreational lakes with excessive algal toxins. Any new developments should not only be distant from the lake shoreline but should also follow formal Low Impact Development (LID) guidelines. In addition, the recreational carrying capacity for the lake should also conducted to determine the maximum amount of boat traffic for lake safety.

If you need any additional information or have questions on the aforementioned information, please feel free to contact me at the information below.

Sincerely,

Dr. Jennifer L. Jermalowicz-Jones, CLP

RECEIVED MAY 13 2021

May, 12, 2021

Cambridge Township Hall 9990 M-50 Onsted, MI 49265

Dear Cambridge Township Zoning Board,

This letter is in response to the Baloor Development and Rezoning project being proposed within Loch Erin. We have been Loch Erin residents since 2013. We specifically bought on Loch Erin because it was a PRIVATE and well managed lake that only allowed private residences and prohibited weekly rentals (all rentals must be one year at a minimum). We believe this helps to provide a safer, quieter, and more stable living environment, as your neighbors are knowledgeable and respectful of the lake rules.

If we allow this to move forward I see a number of issues, such as:

- This type of development is not consistent with the desires of the residents of the area. The fact that this is a PRIVATE lake for permanent residents leads to reasonable and responsible use of the lake and the parks. The behaviors displayed and boat traffic seen on public lakes such as Devil's are not what Loch Erin residents want. If they had wanted that they would have chosen a different lake.
- Having a private boat launch that is not controlled/monitored can lead to multiple issues:
 - The failure to control boats entering the water, that may not be cleaned before entry, could bring invasive species to Loch Erin. (At Higgins Lake, which is located in Roscommon, Michigan this led to the spread of Zebra Muscles in the lake, which led to those entering the water getting swimmers itch, which led to property values declining by up to 50% when use of the lake became limited due to rashes incurred by those getting in the water. The issue was eventually resolved after 9 years and a cost of \$750,000) We do not

- want invasive species brought to Loch Erin, and the township would not want to bear the cost of remediation if that should occur!
- This can also lead to SAFETY issues. It could lead to people using the lake that are not aware of the direction to drive on the lake, which could put other boaters, tubers, skiers, etc. at risk of injury. Due to all the many coves and inlets on the lake – we have a one-way policy at all times.
- o Note: In our opinion this private boat launch serves only the interest of the developer to allow non residents onto the water so that they will frequent his bar/restaurant. We would ask that you consider the rights and desires of RESIDENTS, over non-residents just coming to the lake for the day to use its resources at no cost to them as they can just use the parks (and port-a-potties) that are paid for and maintained by the RESIDENTS, leave their trash behind, and then leave town!
- Potential environmental and water quality issues with a significant increase in lake usage. Things to consider are water run-off, soil erosion, sedimentation programs, plant life, etc.
- There is much that is unknown about the impact this would cause to water and sewer issues in the community.
- Decrease in property values of current owners in and around Loch Erin. This will lead to a decline in tax revenue. This would greatly impact property owners in the direct vicinity, but would also impact all Loch Erin property owners do to the increased and potential transient/non-resident traffic.

Additionally, there is some confusion as to whether this land is or is not part of LEPOA. I have heard there were prior lawsuits related to this topic. I understand there have not been dues paid to LEPOA in years. Additional concerns I see if this type of rezoning is allowed and the land is in fact not part of LEPOA, are as follows:

• These condos could be rented by the owners on weekly basis, which would bring transient renters to our area and lake. See the above safety issues of having boat users on the lake that are not aware of lake rules, etc. Further, Loch Erin is a lake dedicated to permanent residents, and allowing such a change would be counter to what the residents wanted when they chose this

- community. Further, this could lead to current owners/residents having their right to quiet enjoyment of their property violated by short-term renter's.
- They would not be required to pay dues and this would unfairly place the burden of paying for lake maintenance, stocking of the lake, maintenance of the parks, fireworks display, etc. on other community residents even though these condo owners would have access to the lake.

Conversely, if they are part of LEPOA then the proposal should be declined as it violates LEPOA rules, as I understand them, as follows:

- Docks may not be in the water any further than 30 feet from the shoreline (their proposed docks exceed this by a considerable amount).
- Only 5 motorized boats are allowed per 100 feet of frontage (their proposed docks exceed this by a considerable amount).
- No member may have a private boat launch on their property (they are proposing to have their own boat launch).

For the reasons noted above and for all the unanswered questions that remain I would ask that the Zoning Board decline both requests for rezoning of the Springville Highway property that is connected to Loch Erin.

It should be noted that we are not opposed to responsible building of single-family homes (as currently zoned) on the property. We are opposed to the commercial development (bar/restaurant and private boat launch) and the medium density residential change that would allow the condo's to be built. We would like to see the Zoning remain unchanged, and allow only for single-family homes to be built.

In closing, I would like for you all to consider that the proposed project and related rezoning do not conform to the goals, objectives and strategies of the Cambridge Township long-term master plan. Further, it is in violation of the Funneling Act.

Respectfully,

Jeff & Tamara Goetz

5/10/2021

Dear Cambridge Township Zoning Board,

This letter is in response to the Baloor Development and Rezoning project issue at Loch Erin. I have been a Loch Erin resident since 1991, and a local Realtor since 1994. I have great concerns regarding the plans to build a Restaurant/Bar and 75 Condos with dock slips on the proposed 20 acres. The proposed plans do not conform with the goals, objectives, and strategies of the Cambridge Township long term master plan, and is also a violation of the Funneling Act. In fact, they seem to create more problems than they solve, as is typically the case with strip zoning. This rezoning request is an incompatible land use. It does not promote the highest and best use of the land or effective utilization of our resources. This is strip development at its worst, which is highly discouraged and inappropriate and irresponsible for the area. It also does not preserve the integrity or the rural character of the area. To protect the health, safety and welfare of the lake, and the aquatic life, we need a study to understand the impact of the sewer and all water issues, to know how they will all be impacted. We also owe it to the residents to preserve the beautification and the natural appearance of the area, and to allow the continuation of existing agricultural and residential usage with minimal interference from all development. To preserve and protect the natural features of this township, and to avoid any issues of exterior obsolescence, we also should be looking at many other issues, including but not limited to requiring groundwater recharge mapping to be submitted as part of any site plan, ensuring compliance with the Lenawee County soil erosion and sedimentation programs, and preservation of all of our natural features, including the need for physical buffering for all neighbors involved. Some of the small channels to Loch Erin are very shallow, and hard to navigate. This issue alone may also be problematic for all of those proposed docks. There is also an issue of the small 2 lane roads that service this area, and the limited site distance, the traffic patterns, as well as the rate of accidents that happen at the intersection of Springville and Stephenson area, which are not ready for all of the new traffic that this development will bring. There is no doubt that our market needs new

homes, however they should be built in compliance with the current zoning rules and laws. I know that you have an exceedingly difficult decision to make. I appreciate you taking the time to read my letter.

Respectfully Submitted,

Kathy Zmijewski

Subject: Loch Erin/ Springville Road Development

Good Afternoon,

We recently purchased a property on Loch Erin for the sole purpose of being on a private lake. Currently we will being using this as a seasonal home until we retire in 8 years then we planned on making this our permanent residence. Private was the top of our list when looking in the Irish Hills area for lake front property. We are familiar with the area as my grandparents then parents had a place on Lake Columbia and we have visited Wampler's lake frequently. The difference being public and private is vast.

We are enjoying how beautiful the homes and the lake shoreline are. We are saddened to hear that this may change if this new large development takes place. We have boated to the area being proposed and fail to see how that large a marina could fit into that area and still maintain the beauty of Loch Erin. Loch Erin residents paid for peace and serene living. Please keep us in mind in this decision making process.

Thank you for your time,

Michelle Marini & Bill Konarski 8130 Wadding Dr

Sirs,	
We have been Loch Erin residents for over 25 years and our home is around the corner from the proposed Springville Highway development in Cambridge Township. While we are not against development of this property for residential use,	
we are against the high density re	esidential nature of it as proposed. Toperty has 10 sewer taps associated with it. We would not be against the owners
developing 10 homesites on the 2 rezoning so that the property can	20 acres with a combination of lakefront and backlots as appropriate. We are against a be broken up into 70+ homesites, however. As I am sure you are aware, there is land ential on Gilbert Highway just before Slee Rd.
(while they wouldn't directly affect	I use (restaurant/marina) we are against that as well. The boat traffic jams in that area tus) would be monumental and highly unsafe. If the owners would like to start a place can be found that is more suitable than this farmer's field.
As stated in the letters sent to your board by LEPOA's board, the lake itself has health issues and will not respond positively to an additional unplanned development as proposed.	
Please deny both of these re-zoning requests.	
Sincerely,	
Terry & Tammy Weadock

RE: Development on Loch Erin

May 15, 2021

Restorative Lake Sciences was requested by the LEPOA to provide a professional opinion on the potential impacts that additional future development could have on the Loch Erin ecosystem. Loch Erin was recently placed on the impaired waterways list from the USEPA and the state department of Environment, Great Lakes, and Energy (EGLE). This designation means that the lake is not currently able to serve all its expected and available functions due to impairments in its health due to external environmental factors. External factors such as non-point source pollution that are difficult to trace and mitigate have led to increased nutrient loading in Loch Erin and resultant blue-green algal blooms that can secrete neurotoxins and other harmful toxins to humans, pets, fish, and other aquatic life. Loch Erin currently suffers from numerous impairments such as excessive nutrients and algae, extremely low biodiversity of necessary rooted aquatic vegetation, low water clarity, erosion, and high boat traffic.

A significant concern exists with any new additional land development on the lakefront. All of the aforementioned lake issues could be amplified and worsened. This could reduce individual waterfront property values, which in turn could also reduce municipal tax base. In addition, any new impairments could lead to the Loch Erin basin becoming unusable as the USEPA has the ability to shut down recreational lakes with excessive algal toxins. Any new developments should not only be distant from the lake shoreline but should also follow formal Low Impact Development (LID) guidelines. In addition, the recreational carrying capacity for the lake should also conducted to determine the maximum amount of boat traffic for lake safety.

If you need any additional information or have questions on the aforementioned information, please feel free to contact me at the information below.

Sincerely,

Dr. Jennifer L. Jermalowicz-Jones, CLP

Subject: Springville Highway Baloor Development

Dear Tom,

I'm writing in regard to the proposed rezoning and development of the Parcel 800 Block of Springville Highway by Baloor Development LLC. The plans, as presented, go against both the vision for Loch Erin by its original developers and the goals and objectives of the long-term township master plan. This should not be misconstrued as not being forward thinking; I am concerned with maintaining the integrity and well-being of our lake and community.

The request to rezone the waterfront portion of the Springville property to commercial is especially concerning to me. Commercial zoning would allow for a marina to be built on a lake that is otherwise private. While I understand the intent at this point is to build a restaurant on the site, I'm not confident that it would either be followed through as such, or successful, leaving the door open for the land to be used as a marina. Allowing non-residents to launch their watercraft, dock on and use our lake was not the vision for Loch Erin, which is exactly the reason the majority of Loch Erin residents purchased property here: a quiet, *private* lake with residential homes. In addition, the cove between Castlebar and Irish Mist is far too small to house the docks necessary for such a venture (or the proposed plan, in general) and would cause the entire area of the lake to be congested and essentially unusable to surrounding homes.

Loch Erin has been fighting water quality concerns over the past five years and has been taking the necessary steps forward to remediate the issues. Developing the Springville property as it has been presented is a serious concern of the long-term health of our watershed and would be a step in the wrong direction. Additional roadways and such a high volume of driveways on land that is surrounded by agricultural properties will drastically increase the run-off entering our lake; run-off containing sediments, nutrients that feed blue-green algae and pollutants that are harmful to our aquatic life. This is only one example of a serious environmental concern if this property were to be developed in such a manner, but it's one that is important to not only Loch Erin, but our entire downstream watershed. Proper studies would need to be conducted to determine the overall environment impact of such a development.

I, personally, am not against the development of the property as a whole. If developed, however, it should be done in a way that conforms with the surrounding area and withholds the integrity of our rural community. 75 condominiums built within a 20-acre area, averaging 1,200 square feet each does not accomplish that. In closing, I am of the opinion that the zoning requests for the proposed development on Springville Highway should **not** be recommended by the Cambridge Township Planning Commission.

Best,

Jennifer Malcolm

Loch Erin Petition

Found this petition online for Loch Erin

Petition on change.org

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway). The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

Subject: Loch Erin

Subject: Loch Erin POA position on Springville Road development project

To All Concerned,

We are NOT in favor of the proposal for the subject property as shared and discussed by Mr. Buzby on April 28,2021. Loch Erin was envisioned and developed as a private lake community with relatively large lakefront lots, specific home size requirements, and restricted access to the recreational lake to minimize watercraft traffic and ensure safety on lake. LEPOA's opinion is the subject proposal, in the form shared on April 28, 2021, is not consistent with the Loch Erin plan originally approved by the township.

Other issues of concern to LEPOA include:

- Size of proposed living units (1200-1300ft2) is at the extreme low end of minimum size requirements in LEPOA subdivision bylaws. The adjacent subdivisions of Castlebar and Irish Mist have minimum requirements of 1600 ft and 1800 ft respectively. 70+ of these units will adversely impact area home values.
- The safety of 70+ individual wells on this parcel is not known. The issue of additional septic hook-ups.
- The current proposal does not indicate paved roads initially. All LEPOA roadways are paved.
- The impact on traffic in the area is of concern, and the use of Irish Mist road and an Irish Mist owned property with a 10ft utility access easement as an entrance is not viewed favorably.
- The current proposal does not appear to include the required vegetative buffers to provide adequate screening to adjacent properties
- The success of the proposed restaurant is in question. Several local restaurants have either closed or operate with reduced hours. Establishing a new restaurant seems fraught with problems and would create an eyesore for the community if not successful.
- The marina/park is located on a narrow and shallow inlet. Boat traffic in this area would be significantly increased with this proposal and the safety of swimmers and other boaters with this multiplication of boat traffic is of concern.
- EGLE last year put both Loch Erin, and Wolf Creek that feeds Loch Erin, on the endangered waterways list due to pollution/contamination issues. The addition of these housing units and construction associated with this high-density development proposal are likely to add
- to this issue. As the township is aware, LEPOA has partnered with the River Raisin Watershed Council to submit a proposal to EGLE requesting funding to study the issue and develop a Watershed Management Plan for the immediate watershed. A construction project of this size will likely be an impediment to the successful completion of the study.
- RLS, the lake management consultant for Loch Erin and several other local lakes, has indicated concern regarding the potential negative impact this project will have on lake health. RLS is preparing an opinion which will be shared with the

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience. The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway). The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience. The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

to Loch Erin (located between 8875 and 8751 Springville Highway)

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to The development plans, as shared with the public on April 28, 2021 at the Cambridge Township Planning Commission meeting, include a 73 unit dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

At 500 signatures, this petition is more likely to be featured in recommendations!

Loch Erin Community Action Group started this petition to Cambridge Township

I, the signer of this document, am against the proposed rezoning and high-density and/or commercial development of the Springville Highway property that is connected to Loch Erin (located between 8875 and 8751 Springville Highway).

The development plans, as shared with the public on April 28, 2021 at the Cambridge Township

Planning Commission meeting, include a 73 unit condominium development and support facilities, a restaurant/bar, a 75 dock marina, and a boat launch. This development has the potential to dramatically impact the safety, landscape, character, and general welfare of Loch Erin residents, as well as the residents of Springville Highway. Our concerns include the lake and shore environment, boating safety, traffic safety, light and noise pollution, and other damage to the lake experience.

The proposed high-density residential condominium development with adjoining restaurant/bar violates not only the current Cambridge Township zoning laws, but also the spirit of the long-term vision of the Township as detailed in the Township Master Plan.

Note: This petition is not offered, nor intended, as a legal document as defined by the laws governing the initiative process in Michigan, but simply as a formal expression of the opinions of the signers.

Updates

Keep your supporters engaged with a news update. Every update you post will be sent as a separate email to signers of your petition.

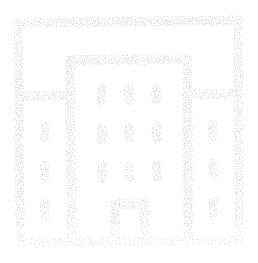

Post an update

1. No to Rezoning Lake Residential to Commercial

There's a request to rezone 3.19 acres from Lake Residential to Commercial zoning for a bar/restaurant which adjoins single family residential homes properties.

ybName City State Postal Code Country Commented Date Comment

Katherine Welty Birmingham MI 48009 US 2021-05-08 I am against this new development.

Delilah Smith Jackson MI 49203 US 2021-05-09 This is a private lake and that is why we have bought here. I am against this.

Patricia Kwiatkowski Onsted MI 49265 US 2021-05-09 This would make Loch Erin a public lake. I'm against it!

Michele Pfeffer Manitou Beach MI 49253 US 2021-05-11 Michele Pfeffer

Carl Bobo US 2021-05-11 I signed it because this will bring the BLM supporters in and ruin the small town charm onsted has. I catch some great large mouth bass on this lake and I dont need these hooligans to ruin my Joseph Taylor Detroit MI 49265 US 2021-05-11 This is exactly what money hungry people do. They have no regard for who it will impact!

Tyler Foster Freeland MI 48623 US 2021-05-11 Preserve the land, Don't ruin a small town and make it a suburbia. Its people are who they are cause they come from a small town of just a few. Rebuild the town and make Erika Escue Holland 43528 US 2021-05-11 75 (overpriced and cramped) condos and turning a private lake into a public one. This is NOT why any of us mover here.

John Matthews Novi MI 48377 US 2021-05-11 The lake already has documented water quality issues, by professional companies. Adding more traffic and congestion to the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will inherently add more pollution and degration from the lake will be added to the lake will be added

Wendy Gordon Mesa AZ 85207 US 2021-05-11 I lived on Loch Erin for years. Our beach was completely washed away from traffic going to fast in a no wake zone. This plan will drastically increase traffic and erode the short SANDY beaubien Brooklyn MI 49230 US 2021-05-11 The lake is not big enough for that many people. Neither is the school big enough.

Shelley Hunt Adrian MI 49221 US 2021-05-11 As a realtor, I see numerous issues with the rezoning of this development. The main one being that those who live on this lake, chose it because it is a PRIVATE lake. You are BILLY Konarski Livonia MI 48154 US 2021-05-11 We bought a house here in January for the sole purpose of a private, quiet lake. This decision will take away the beauty that Loch Erin has to offer.

Catherine Gniewek Onstewn MI 49265 US 2021-05-11 I'm signing because I oppose the proposed rezoning and high-density and/or commercial development of the Springville Highway property located between 8875 and Melinda Baughey Tipton MI 49287 US 2021-05-12 This is not what the Irish hills should be known for or should be. The people that are here do NOT want to have this in our back yard. If we did we would move to the city Marcine McBride West Bablyon NY 11704 US 2021-05-12 Too much development is destroying the ambiance of people's neighborhoods, destroying the environment, and driving wildlife to extinction. People matter!Nature acrows Seminole FL 33777 US 2021-05-12 I agree with the views held by Pam Miller Poling.

David P. Hohenstein Onsted MI 49265 US 2021-05-12 We have enjoyed a quiet, private lake for above twenty years and consider the proposed worthless and a disaster for our shallow waterway.

Natascha Barney Duluth GA 30097 US 2021-05-13 Our family owns a house on Loch Erin. With three kids 8 and under, I plan on spending many years enjoying the lake. This development would hinder the safety and well Sherri Held Onsted MI 49265 US 2021-05-15 I'm a home owner on Loch Erin. We do not want the condos or restaurant. We want the lake to be private. That's why we live here.

Mona Worsham Onsted MI 49265 US 2021-05-16 I'm a home owner on Loch Erin. We do not want the condos or restaurant. We want the lake to be private. That's why I live here. This lake is not big enough and the water

LOCH ERIN PROPERTY OWNER'S ASSOCIATION

P.O. Box 302 Onsted, Michigan 49265

Office telephone: 517-467-4834 Email: locherinproperty@gmail.com Website: www.locherinpropertyownersassociation.com

May 12, 2021

To: William Gentner, Cambridge Township Supervisor Annette Roesch, Cambridge Township Clerk Tom Kissel, Chair of Planning Commission

From: Loch Erin Property Owners Association

Subject: Loch Erin POA position on Springville Road development project

To All Concerned,

The Loch Erin Property Owners Association (LEPOA) Board would like to convey it is NOT in favor of the proposal for the subject property as shared and discussed by Mr. Buzby on April 28,2021. Loch Erin was envisioned and developed as a private lake community with relatively large lakefront lots, specific home size requirements, and restricted access to the recreational lake to minimize watercraft traffic and ensure safety on lake. LEPOA's opinion is the subject proposal, in the form shared on April 28, 2021, is not consistent with the Loch Erin plan originally approved by the township.

In its current form, LEPOA believes the proposal violates several township ordinances (Section 36.256 and Section 36.258) and re-zoning/re-districting of the subject property to a status not consistent with the surrounding properties and land use plans would be required.

Other issues of concern to LEPOA include:

- Size of proposed living units (1200-1300ft²) is at the extreme low end of minimum size requirements in LEPOA subdivision bylaws. The adjacent subdivisions of Castlebar and Irish Mist have minimum requirements of 1600ft² and 1800ft² respectively. 70+ of these units will adversely impact area home values.
- The safety of 70+ individual wells on this parcel is not known.
- The current proposal does not indicate paved roads initially. All LEPOA roadways are paved.
- The impact on traffic in the area is of concern, and the use of Irish Mist road and an Irish Mist owned property with a 10ft utility access easement as an entrance is not viewed favorably.
- The current proposal does not appear to include the required vegetative buffers to provide adequate screening to adjacent properties.

- The success of the proposed restaurant is in question. Several local restaurants have either closed or operate with reduced hours. Establishing a new restaurant seems fraught with problems and would create an eyesore for the community if not successful.
- The marina/park is located on a narrow and shallow inlet. Boat traffic in this area would be significantly increased with this proposal and the safety of swimmers and other boaters with this multiplication of boat traffic is of concern.
- EGLE last year put both Loch Erin, and Wolf Creek that feeds Loch Erin, on the endangered waterways list due to pollution/contamination issues. The addition of these housing units and construction associated with this high-density development proposal are likely to add to this issue. As the township is aware, LEPOA has partnered with the River Raisin Watershed Council to submit a proposal to EGLE requesting funding to study the issue and develop a Watershed Management Plan for the immediate watershed. A construction project of this size will likely be an impediment to the successful completion of the study.
- RLS, the lake management consultant for Loch Erin and several other local lakes, has
 indicated concern regarding the potential negative impact this project will have on lake
 health. RLS is preparing an opinion which will be shared with the township when
 completed.

Respectfully Submitted,

Christian Malcolm LEPOA President

Cambridge Township Hall 9990 M-50 Onsted, MI 49265

Dear Cambridge Township Zoning Board,

This letter is in response to the Baloor Development and Rezoning project being proposed within Loch Erin. We have been Loch Erin residents since 2013. We specifically bought on Loch Erin because it was a PRIVATE and well managed lake that only allowed private residences and prohibited weekly rentals (all rentals must be one year at a minimum). We believe this helps to provide a safer, quieter, and more stable living environment, as your neighbors are knowledgeable and respectful of the lake rules.

If we allow this to move forward I see a number of issues, such as:

- This type of development is not consistent with the desires of the residents of the area. The fact that this is a PRIVATE lake for permanent residents leads to reasonable and responsible use of the lake and the parks. The behaviors displayed and boat traffic seen on public lakes such as Devil's are not what Loch Erin residents want. If they had wanted that they would have chosen a different lake.
- Having a private boat launch that is not controlled/monitored can lead to multiple issues:
 - The failure to control boats entering the water, that may not be cleaned before entry, could bring invasive species to Loch Erin. (At Higgins Lake, which is located in Roscommon, Michigan this led to the spread of Zebra Muscles in the lake, which led to those entering the water getting swimmers itch, which led to property values declining by up to 50% when use of the lake became limited due to rashes incurred by those getting in the water. The issue was eventually resolved after 9 years and a cost of \$750,000) We do not

- want invasive species brought to Loch Erin, and the township would not want to bear the cost of remediation if that should occur!
- This can also lead to SAFETY issues. It could lead to people using the lake that are not aware of the direction to drive on the lake, which could put other boaters, tubers, skiers, etc. at risk of injury. Due to all the many coves and inlets on the lake – we have a one-way policy at all times.
- Note: In our opinion this private boat launch serves only the interest of the developer to allow non residents onto the water so that they will frequent his bar/restaurant. We would ask that you consider the rights and desires of RESIDENTS, over non-residents just coming to the lake for the day to use its resources at no cost to them as they can just use the parks (and port-a-potties) that are paid for and maintained by the RESIDENTS, leave their trash behind, and then leave town!
- Potential environmental and water quality issues with a significant increase in lake usage. Things to consider are water run-off, soil erosion, sedimentation programs, plant life, etc.
- There is much that is unknown about the impact this would cause to water and sewer issues in the community.
- Decrease in property values of current owners in and around Loch Erin. This will lead to a decline in tax revenue. This would greatly impact property owners in the direct vicinity, but would also impact all Loch Erin property owners do to the increased and potential transient/non-resident traffic.

Additionally, there is some confusion as to whether this land is or is not part of LEPOA. I have heard there were prior lawsuits related to this topic. I understand there have not been dues paid to LEPOA in years. Additional concerns I see if this type of rezoning is allowed and the land is in fact not part of LEPOA, are as follows:

• These condos could be rented by the owners on weekly basis, which would bring transient renters to our area and lake. See the above safety issues of having boat users on the lake that are not aware of lake rules, etc. Further, Loch Erin is a lake dedicated to permanent residents, and allowing such a change would be counter to what the residents wanted when they chose this

- community. Further, this could lead to current owners/residents having their right to quiet enjoyment of their property violated by short-term renter's.
- They would not be required to pay dues and this would unfairly place the burden of paying for lake maintenance, stocking of the lake, maintenance of the parks, fireworks display, etc. on other community residents even though these condo owners would have access to the lake.

Conversely, if they are part of LEPOA then the proposal should be declined as it violates LEPOA rules, as I understand them, as follows:

- Docks may not be in the water any further than 30 feet from the shoreline (their proposed docks exceed this by a considerable amount).
- Only 5 motorized boats are allowed per 100 feet of frontage (their proposed docks exceed this by a considerable amount).
- No member may have a private boat launch on their property (they are proposing to have their own boat launch).

For the reasons noted above and for all the unanswered questions that remain I would ask that the Zoning Board decline both requests for rezoning of the Springville Highway property that is connected to Loch Erin.

It should be noted that we are not opposed to responsible building of single-family homes (as currently zoned) on the property. We are opposed to the commercial development (bar/restaurant and private boat launch) and the medium density residential change that would allow the condo's to be built. We would like to see the Zoning remain unchanged, and allow only for single-family homes to be built.

In closing, I would like for you all to consider that the proposed project and related rezoning do not conform to the goals, objectives and strategies of the Cambridge Township long-term master plan. Further, it is in violation of the Funneling Act.

Respectfully,
