MDOT Local Bridge Program

JN 209883 S. Jackson Bridge Replacement

Project documents have been submitted for a summer letting date. This project completion date has been extended until next year due to bridge construction cost pressures. The bridge project itself will still have stipulations on the amount of time that it can be closed for construction. This project will replace the existing bridge with a precast box culvert.

Transportation Alternatives Program (TAP) Grant – Shared-use Pathway Project

JN 210635 Mike Levine Lakelands Trail Extension

The Michigan Department of Environment, Great Lakes, and Energy is requiring hazardous material testing through the Consumers easement. Also working with a property owner to obtain an easement for the path along Lansing Avenue. Once these issues are resolved, a letting date can be determined.

PROJECT REPORT
2020-2023 TIP

May 2022

1. Grants

- a. We are continuing to seek out competitive grant opportunities to fund TIP approved projects.
- b. We are in the process of completing our annual application for formula funding through the FTA.

2. Vehicle Procurements

- a. We are still working with Gillig to get the requested pricing on options for the new bus we ordered such as, the driver barrier, installation of a bike rack, and the use of the Quantum automated wheelchair securement position instead of the traditional wheelchair restraints. Once we have that price quote, we will be able to process the change order for the bus we initially ordered and add the other two (2) buses to the order which we recently received the competitive funding for.
- b. We submitted to Hoekstra an order for three (3) new Ford Transit vans. The current wait time for manufacture and delivery of the vehicles is approximately 6-8 months. These vehicles are being procured through a State of Michigan vehicle contract.

3. Bus & Bus Components

- a. As we reported last month, we are currently working with the State of Michigan, through MDOT, to procure automated wheelchair securements. This project involves retrofitting six (6) of the city buses in our current active fleet with the new wheelchair securement positions as well as retrofitting the seating to be compatible with the new wheelchair positions. The vendor chosen for this procurement by MDOT is Q'Straint. On April 4th, we submitted the purchase order to get this project in motion. We are currently anticipating receiving the equipment by July 2022, however, the representative from Q'Straint stated he was going to attempt to get the necessary equipment for the retrofit to us prior to that.

4. Facility Upgrades

- a. We have received the site plans for a final review from the engineering and architectural firm, Fishbeck, for the concrete replacement project at the downtown Transfer Center. Pending approval, we will be able to compose the request for proposal (RFP) and begin the procurement process for the construction phase of the

2350 East High Street
Jackson, Michigan 49203-3490
517.787.8363

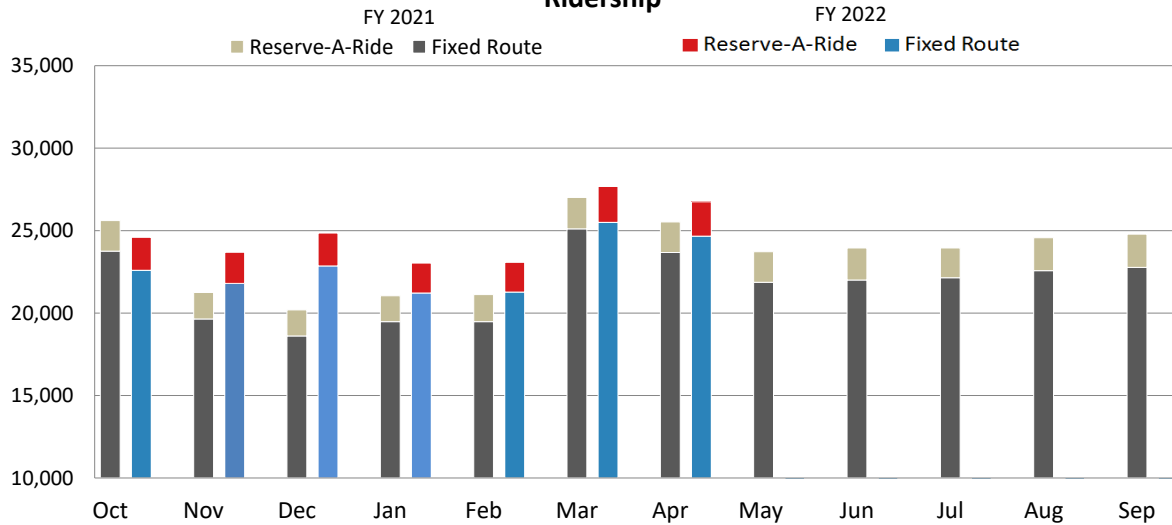

- project. They are adding some additional design work in as the catch basins along the driveway are in ill repair and in need of rebuilding as well.
- b. We have published the RFP for the bus lift project in our maintenance facility. We anticipate awarding the project June 17, 2022, assuming we receive enough bids.
 - c. The overhead doors for our maintenance and bus storage facilities are weathered, worn, and becoming cost prohibitive to maintain. I have been able to secure approval from the FTA to reallocate funds from older grants to finance a project to replace these doors throughout our facility. We are still waiting on MDOT to approve the updated project. Once that is completed, we will be able to start the procurement process.

RE: Opportunity for Public Comment – Approval of the FY 2023-2026 Transportation Improvement Program (TIP)

DATE: May 10, 2022

R2PC staff has prepared the Jackson Area Comprehensive Transportation Study (JACTS) DRAFT Fiscal Year (FY) 2023-2026 Transportation Improvement Program (TIP). The TIP documents the anticipated timing and cost of transportation improvements that utilize federal funds, in addition to any non-federally funded projects that are considered regionally-significant. The types of projects in the TIP include all modes of transportation, such as roadway construction, operations and reconstruction, bicycle and pedestrian, public transit and aviation. The TIP is a program and schedule of intended transportation improvements, or a continuation of current activities, through a four year period (Fiscal Years 2023 through 2026) and is considered the implementing tool of the JACTS 2045 Long Range Transportation Plan.

The projects being considered for inclusion into the document are provided on the following pages. Any anticipated changes to the projects known, to date, are explained in detail below each project. The full FY 2023-2026 TIP document is included after the project list, for the committees' review.

Please review the project list to ensure the accuracy of all projects and contact me prior to May 18th if any updates should be made. R2PC staff will consolidate and present all comments received prior to voting for approval of this document.

R2PC staff is seeking review and approval of the document, pending any public comments that may be received after the May JACTS meetings.

Thank you,
Anton Schauerte
